

FOR IMMEDIATE RELEASE

WetStone Technologies Debuts Its McAfee Solution Services Video Series

October 7, 2020. WetStone Technologies, the Cyber Security Division of Allen Corporation of America, announced today the release of its McAfee Solution Services video series, which it will make available immediately to WetStone's McAfee Health Check PLUS and Quick Start PLUS Services clients.

WetStone's unique McAfee Solution Services video series provides best practices training in a format that is ideal for developing the McAfee deployment and administration expertise of an organization's in-house security staff. The instructional content associated with each McAfee solution subject area is featured in brief, self-contained videos delivered by a member of WetStone's experienced professional services team. Each instructor is a McAfee certified consultant with significant experience in the implementation, optimization and administration of McAfee solutions in a wide range of customer environments. New video content will be added regularly and will address both new topics and important changes to McAfee product areas covered in existing videos.

“The practical, hands-on training format of these videos makes it easier for individuals charged with the day-to-day management of an organization's McAfee security products to identify the content that is most relevant to their needs,” said Carlton Jeffcoat, WetStone's Senior Vice-President. “Since learning content is delivered in small, single-topic sessions, employees will be able to acquire and apply that knowledge in their own McAfee environment ... as they need it.”

Access to WetStone's McAfee Solution Services video series is paired with scheduled mentoring sessions with a certified, experienced McAfee subject matter expert (SME). These SME's have been vetted by McAfee Professional Services' Technical Practice Managers, are certified in the McAfee products, and have extensive experience in a wide variety of professional services engagements, deploying McAfee security solutions for small and medium sized businesses, Fortune 500 companies, and government and educational organizations, worldwide.
