

FOR IMMEDIATE RELEASE

WetStone Technologies Inc. Announces New Release of Gargoyle Investigator™MP

December 16, 2020. WetStone Technologies, the Cyber Security Division of Allen Corporation of America, announced today the release today the availability of a new version of its premier malware discovery tool, Gargoyle Investigator™ MP. Version 7.4 adds significant capabilities to Gargoyle MP, improving the efficiency and focus of Digital Forensics and Incident Response (DFIR) investigations.

Gargoyle MP simplifies breach and malware triage investigations and incident response activities. Investigators can perform a rapid search for malicious applications and lost or leaked corporate assets. Gargoyle MP is designed to provide significant clues regarding the activities, motives and intent of a suspect.

Features introduced in Version 7.4:

- Significant reduction in the file sizes of Factory and Supplemental Datasets
- Improved reporting
- Improved performance
- User-defined filtering of detections by malware category
- Whitelisting of user-created Golden Images
- Additional archive file type support
- Identification of malware hotspots
- Reporting all password-protected archives
- Additional integrations for forensic toolkits from Paraben, AccessData, and Autopsy

Gargoyle Investigator MP is licensed as an Electronic Software Download (ESD) for forensic workstations or on WetStone-supported USB flash drives (G-Flash) for field investigations. Current Gargoyle Investigator and G-Flash users with active support agreements may upgrade to version 7.4 at no additional charge.
